26-Port Cloud Managed Switch with 24-Port PoE

PoE2.0

· Supports visualized management and remote maintenance.
· Supports automatic network topology generation.
· 250 m long-distance power supply.
· 8-pin PoE offers better compatibility and reduces cable loss.
· PoE watchdog monitors the status of terminals in real-time.
· Supports the power management policy.

System Overview

Cloud Managed Switch is a layer-2 commercial switch that has a long-distance PoE function. It can supply power to devices up to 250 meters away. The PoE red port supplies up to 90W. The Switch can be managed through the DoLynk Care app, allowing you access to the network topology diagram function, which can be used to quickly identify issues. The DoLynk Care app is developed based on DoLynk Care Cloud Server. The Switch is applicable for use in a wide variety of scenarios, such as in homes, factories and offices.

Functions

Network topology Visualization
Supports LLDP protocol and automatically generating the network topology to quickly identify issues.

Cloud Management
You can operate and maintain the switch on the app of the mobile terminal, greatly reducing the cost of operation and maintenance.

Long Distance PoE
The transmission distance of a PoE port can be up to 250 m, meeting the requirement of wired transmission (bandwidth reduced to 10 Mbps).

Red Port 90W
The red ports support IEEE802.3af, IEEE802.3at, IEEE802.3bt and Hi-PoE standards, with a maximum output power consumption of 90W per port. Suitable for powering high-power devices.

PoE Watchdog
It enables the switch to automatically detect port status and restart the failed ports to recover connection in case of IPC connection exception. This enables intelligent operation and maintenance management in its true sense and effectively reduces manual maintenance costs.

Scene

Suitable for scenarios such as households, offices, and factories.
